Payment Flow Explanation

PENNYGRADE | RAZORPAY MERCHANT READINESS PREPARATION

DRAFT - Internal preparation document. Not proof of approval, registration, signed partnership, issued card, or customer transaction.

What PennyGrade charges

One membership fee currently shown as INR 500 for the six-month membership. This payment is for PennyGrade's own product.

Checkout controls

Active plan price is read server-side. Before a payment order is created, the production database inventory must confirm available physical stock. Inventory lookup errors and zero stock now stop checkout; local JSON/demo inventory is not a production stock source.

Verification and fulfilment

Payment signature and provider status are validated server-side. Webhook signature/replay handling and idempotent fulfilment are implemented in source. Membership is activated only after confirmed payment; card assignment uses database inventory in the production flow.

Partner sale

Member's later purchase from a restaurant, salon, retailer or other partner is a separate transaction. Customer pays the partner directly. PennyGrade does not collect or settle that partner bill.

Limits

This pack does not claim Razorpay approval, live credentials, live payment execution, live webhook delivery, refund settlement or production deployment.

Before external submission: verify every stated fact against current operations and business records. Razorpay and qualified legal/tax advisers make their own determinations.
