Physical Card Fulfilment

PENNYGRADE | RAZORPAY MERCHANT READINESS PREPARATION

DRAFT - Internal preparation document. Not proof of approval, registration, signed partnership, issued card, or customer transaction.

Sequence

Verified payment -> atomic available-card assignment -> membership activation -> order confirmation -> pack and quality-check card -> record handover/courier and tracking details -> track delivery -> record delivery or exception.

Inventory control

Production inventory is in Supabase. The payment-order path fails closed if inventory cannot be read or no stock is available. It does not create an invented physical card number to satisfy an order.

Exceptions

A paid order without an assigned card is a fulfilment exception requiring prompt manual follow-up and customer communication. Stock should be monitored before checkout opens; never describe a card as assigned until the database assignment succeeds.

Evidence to retain

Order and payment reference; allocated physical card record; packing check; dispatch date; delivery provider and tracking ID where applicable; delivery outcome; support/refund correspondence.

Before external submission: verify every stated fact against current operations and business records. Razorpay and qualified legal/tax advisers make their own determinations.
